Jan 13,22	Website was ready with a homepage and a signup page.	4
Jan 13,22 to Jan14, 22	Added a bit of JavaScript in the website with the login prompts.	5

References

1. <https://www.w3schools.com/html/>

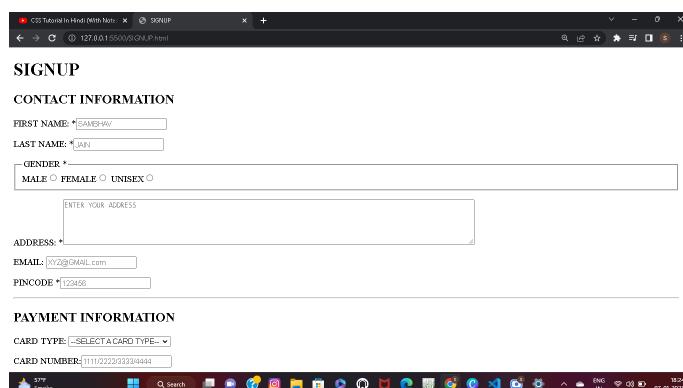

<https://www.youtube.com/watch?v=HcOc7P5BMi4>

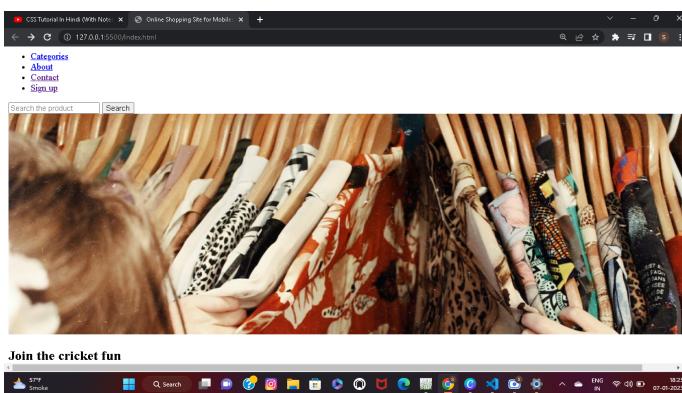

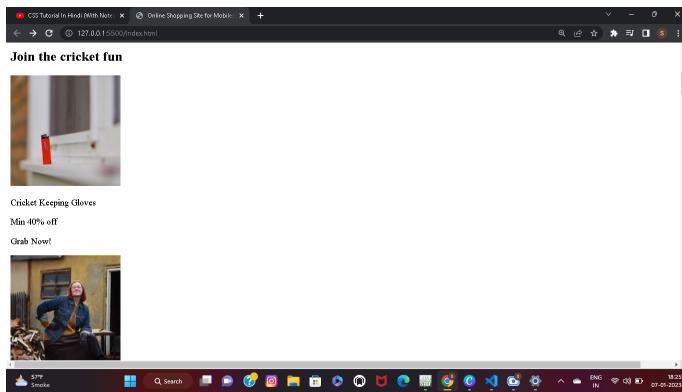

Used these 2 links to start with the basics of HTML. The second link was a HTML tutorial by 'Apna College' i.e. publicly available on YouTube.

2. For practically learning the languages, I chose a task of creating a Flipkart clone website.

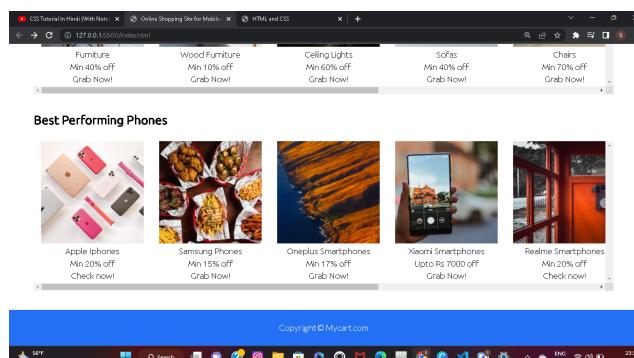

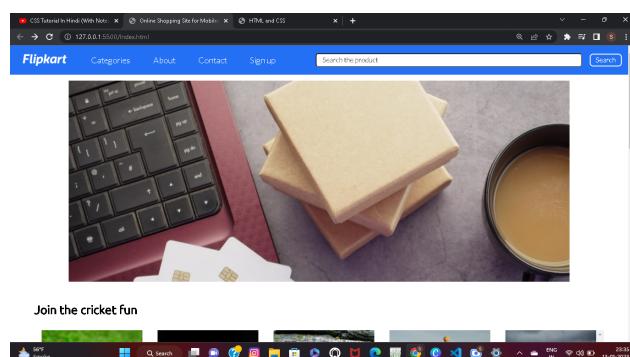

For this, I referred to https://www.youtube.com/watch?v=Edsxf_NBFrw. This video have a Flipkart clone project. I started coding the website without CSS.

3. After completing the HTML coding, the website was ready but it seemed like nothing with proper web design. So, to start CSS, I referred to the same tutorial video mentioned above in 2. to learn the basics of CSS. Also watched "https://www.youtube.com/watch?v=l1EssrLxt7E&list=PLfqMhTWNBTTe3H6c9OGXb5_6wcc1Mca52n". Without CSS, the website looked like this.

4.The website was ready with Html and CSS. Almost same to the homepage of original Flipkart .
